ALK Mutations in Infantile Hemispheric Glioma: Targeting the Future

Presenter: Ana Izurieta (ES)

I'm Ana Carolina, current Fellow in Paediatric Oncology at Sant Joan de Déu Hospital in Barcelona. Since my last year of pediatrics residency in 2020 I have dedicated to Paediatric Oncology with special interest in solid tumors and precision oncology. I am aware of the actual need in oncology research in terms of targeted therapy as well as immunotherapy which are the areas I would like to enlist my research as well as expanding this knowledge to low-income countries.
