Speaker Profile

18 October 2023

Immunotherapy for recurrence of fibrolamellar hepatocellular carcinoma (FL-HCC) in a young teenage girl

Speaker : Johan Hamrin (SE)

My name is Johan Hamrin, and I am a paediatric oncologist working at Karolinska University Hospital in Stockholm, Sweden. I received my medical training at the University of Heidelberg, Germany, which also included an Erasmus exchange-year to Lausanne, Switzerland.

I started my paediatric residency at Karolinska University Hospital with an emphasis on infectious diseases and completed my PhD on viral respiratory tract infections in children. I discovered my interest in paediatric oncology towards the end of my paediatric training and recently completed my fellowship in paediatric oncology.

My clinical focus is on solid tumours, with a special interest primary liver and kidney tumours as well as retinoblastoma. I also spend 20% of my clinical time working within the paediatric home care team.
