Learning from misdiagnosis

Presenter: Jimena de Pedro (ES)

Jimena de Pedro, MD, is currently an attending physician at Hospital Universitario Cruces in Bilbao, Spain. Also, she is a PhD student at IISS Biocruces Health Research Institute. In 2018 she completed a 3 month observorship at Great Ormond Hospital. Her main interests are pediatric Leukemias, lymphomas, brain tumors and new drugs/clinical trials.

She is a member of the Spanish Society of Pediatric Oncology and the International society of Pediatric Oncology

Expert: Daniel Orbach (FR)

Daniel Orbach is a pediatrician specializing in oncology. He heads up the Department of Pediatric, Adolescent, and Young-Adult Oncology at Institut Curie. He is a member of the French and European groups of doctors working on childhood and adolescent soft tissue sarcoma (SFCE [French Society of Childhood and Adolescent Cancers and Leukemia] committee and the EpSSG). He coordinates the French very rare childhood cancer group ("Fracture") and is a founding member of the European group of pediatricians that care for young patients with very rare cancers (Expert Group).

He is also a member of the SFCE's childhood malignant germ cell tumor (MGCT) committee.

Dr. Orbach is involved in several clinical and translational research projects seeking to improve the understanding and treatment of these forms of cancer.
