Speaker Profile

15 February 2023

New diagnostic possibilities in metastasized neuroblastoma

Speaker : Dorus Kouwenberg (NL)

My name is Dorus Kouwenberg. I completed my specialization in pediatrics in June 2020. From August 2020 until December 2021, I worked as a pediatrician in the solid tumors department of the Princess Máxima Center for pediatric oncology. During this period, the clinical care for patients with neuroblastoma was an important part of my work. I started my fellowship in pediatric oncology in 2022. In addition to my clinical activities, I am working on a PhD project on cardiotoxicity of childhood cancer treatment.
