

GOLD SEPTEMBER 2025

No Child Left Behind: Prioritising Childhood Cancer in the Next EU Budget

23.09.2025, 17.00 - 19.00 CEST

European Parliament (SPAAK 7C50), Brussels

Co-hosted by MEP Vlad Voiculescu (RE, RO) & MEP Romana Jerkovic (S&D, HR)

The European Society for Paediatric Oncology (SIOPE) and Childhood Cancer International - Europe (CCI-E) invite you to participate in this key event dedicated to raising awareness about paediatric cancers in Europe and advocating for continued and increased EU funding for childhood cancers in the next Multiannual Financial Framework (MFF). The MFF is the EU's long-term budget that sets expenditure priorities for a seven-year period, shaping investments in critical areas such as healthcare and research.

The current MFF (2021–2027) has supported paediatric oncology through EU4Health and Horizon Europe, driving progress in care, research, and innovation. Initiatives like Europe's Beating Cancer Plan and the EU Cancer Mission further show the EU's commitment.

However, challenges in implementation remain. To significantly address these issues, it is imperative that the unmet needs of childhood cancer patients and survivors remain a priority for the EU, emphasising the need for continued funding in the next MFF.

This event will explore both the successes and the gaps in the implementation of Europe's Beating Cancer Plan and the EU Cancer Mission. The discussion will focus on how these gaps must be addressed in the next MFF to ensure progress.

Join us in Brussels to ensure that no child is left behind in the next EU budget.

Agenda
