

## Webinar Steering Committee:

### Roelof van Ewijk

I am Roelof van Ewijk. I am a research and clinical fellow at the Princess Máxima Center for Paediatric Oncology in Utrecht, the Netherlands. My research focus is clinical response assessment in pediatric bone and soft-tissue sarcoma, aiming to contribute to the improvement of care and survival in pediatric sarcoma patients. Through Young SIOPE I am involved in the essential medicines project and ERN Paedcan ESCP project, both in the osteosarcoma group. I am a member of the Young SIOPE steering committee and one of my main responsibilities is education. As such I am involved in the organization of the SIOPE mastercourse, educational webinars and the coordination of the 'most challenging cases in paediatric oncology' in collaboration with ERN Paedcan.
