

## Speaker Profile

16 February 2022

## Second, Peculiar Recurrence of a Wilms Tumor: Pleural and Late

**Presenter:** Andrada Turcas (BE)

Andrada Turcas is a radiation oncology trainee and PhD student from Cluj-Napoca, Romania. Her interests include paediatric radiotherapy and neuro-oncology, as well as adult and paediatric sarcomas and other rare cancers. As of November 2021, she is a research fellow within SIOPE's RTQA project (QUARTET) in Brussels, Belgium.

**Expert:** Norbert Graf (DE)

Norbert Graf is Professor of Paediatrics and Director of the Clinic for Paediatric Oncology and Haematology and a member of the Faculty of Medicine of the Saarland University, being currently the dean for study affairs. He is the chairman of the Renal Tumour Study Group of the International Society of Paediatric Oncology (SIOP-RTSG) and the Principal Investigator of the current Trial for Childhood Renal Tumours within SIOP. He is an Associate Member of COG (Children's Oncology Group, North America) and closely cooperating with the COG Renal Tumor Study Group. Prof. Graf has more than 30 years of experience in running clinical trials. He is author or coauthor of around 400 scientific papers and a member in many national and international scientific societies being also a director of the board of the VPH-Institute. In his research activities, he tries to pave the way to personalized medicine by fostering translational research, specifically in kidney tumours in childhood. This is well demonstrated by participation in several European funded research project and being the scientific coordinator of p-medicine.
