

Webinar Steering Committee:

Sofia Castro

My name is Sofia Castro and I am a Paediatric Surgeon working in Porto, Portugal. I have just concluded my general training in Paediatric Surgery, after a 3-month internship done in Wroclaw (Poland) in 2020, and now I shall conduct a more specific training in Paediatric Surgical Oncology by joining the Oncology team of my hospital (national reference hospital for Paediatric Solid Tumours).

Following the work done during my training I continue doing clinical research in order to improve medical and surgical care provided to children.

Also, I am currently an EPALS (European Paediatric Advanced Life Support) instructor credited by the ERC (European Resuscitation Council).

I am honoured to be on the ERN PaedCan Webinar Steering Committee, and I look forward to enhance education to everyone interested in caring for children with cancer, specially in the surgical area.
