Speaker Profile

17 January 2024 **The diagnosis, treatment and follow-up of gastrointestinal stromal tumor in an adolescent patient**

Speaker: Marta Andrzejewska (Poland)

Marta Andrzejewska is currently a medical intern at Poznan University Clinical Hospital, Poland; however, she has been engaged in the work of the Department of Pediatric Oncology, Hematology and Transplantation at Poznan University of Medical Sciences since she started her medical degree. Her interests include genetic predisposition to pediatric cancer, as well as the impact of genetics on treatment personalization. She completed various international internships and courses, including a summer school organized by Prinses Máxima Centrum, a course covering predisposition to malignancy at Institut Curie, Paris and a clinical clerkship at Kepler Universitätsklinikum in Linz, Austria, among others.
