

20-21
January 2016
Brussels, Belgium

Join us at the CDDF-ITCC-SIOPE
4th Annual Paediatric
Oncology Conference

SAVE THE DATE

The Cancer Drug Development Forum (CDDF) 2016 Paediatric Oncology Conference is the fourth meeting of an ongoing series of annual conferences organized in partnership with the Innovative Therapies for Children with Cancer (ITCC) and the European Society of Paediatric Oncology (SIOPE).

The CDDF-ITCC-SIOPE multi-stakeholder pediatric oncology platform aims at improving the development of new oncology drugs for children and adolescents. This is a forum for discussion with all stakeholders (academia, parents and survivors, industry and regulators, as well as policymakers and charities) with a set work program translating into concrete actions.

The 2016 conference will share progresses and discuss the following proposals made by the working groups:

- **New strategies for improved development of oncology drugs for children and adolescent:**
 - Mechanism of action based development strategy
 - Compound prioritization
 - Changes needed in the paediatric medicine regulation
- **New incentives for specific paediatric drug development and drug repositioning.**
- **Implementation of long-term follow up measures of children and adolescents receiving new anticancer drugs.**

Recent successes in new drug development will be shared.

Who should attend ?

Anyone interested in the developing field of new life-saving medicines for children and adolescents with cancer.
